

Kolor Kut Water Finding Paste for E85/B100

#GENE840 - one tube

Handy, non-hazardous paste detects water in tanks.

- Easily test for water in a fuel tank by spreading a thin film of Kolor Kut® onto a dipstick or other graduated rod
- This modified version is specifically for use with Methanol & Ethanol enriched fuels, E85/B100
- Dark brown paste turns bright red after contacting water, clearly measuring the level of water in your tank
- Will not harm or alter the composition of gasoline, kerosene or any other fuel
- Paste is made entirely of non-hazardous materials and cleans off easily after use
